

# Electronic Seminar on Mathematics Education

## Using Inquiry and Active Learning in Mathematics - and how COMMITs can help

Christine von Renesse, Westfield State University

In this very active session, participants will experience doing a mathematical activity in a remote synchronous setting. They will then use this experience to reflect on learning and teaching, especially in the current remote setting. Finally we will think about how we can use

communities of practice like the Communities for Mathematics Inquiry in Teaching, COMMITs (<https://www.comathinquiry.org/>), to support each other in becoming even better educators.

**Noon ET, February 16, 2021**
